Интернет**

The provisional agenda drafted by Form Secretariat lacks one of the key elements related to the issues of Internet governance that was actively discussed during the second phase of the World Summit on the Information Society (WSIS) and was included by consensus in the Tunis Agenda for the Information Society adopted at the Summit as the first paragraph of the mandate of the Forum (paragraph 72 a), namely the principles and future mechanisms of setting up international Internet governance. Therefore, the Russian Federation proposes to include «Governance» as the first set of items on the Forum agenda.

**Proposals of the Russian Federation to the Agenda  
of the Internet Governance Forum**

**1. Governance**

A set of issues related to the key elements of Internet governance in order to foster the sustainability, robustness, security, stability and development of the Internet, including the organization Internet governance.

Issues of administrative management of the Domain Name System and IP addresses.

**2. Information security**

A set of issues including the problems of cybersecurity, spam, threats of cybercrime, cyberterrorism and the potential to use the Internet by states for purposes that are inconsistent with the objectives of maintaining international stability, peace and security.

**3. Access**

Issues of bridging the digital divide, including the problem of unequal access to information as well as the affordability, reliability and quality of service.

#### **4. Openness**

The freedom to seek, receive, impart and use information; access to knowledge, protection of information and the right of privacy.
